### Barracuda Web Filter Login – Accessing Video Streaming Sites

Denair USD runs a student-driven network that sometimes blocks web sites staff members need to access for instructional purposes. Sites like YouTube and Vimeo pose challenges for our web filter when it comes to filtering secure web pages.

In an effort to make accessing secure web sites easier, we have added a link on DUSD web pages that will allow you to log into the Barracuda Web Filter *prior* to browsing secure pages, like YouTube and Vimeo. The link is located in the District Quick Links, in the left menu.

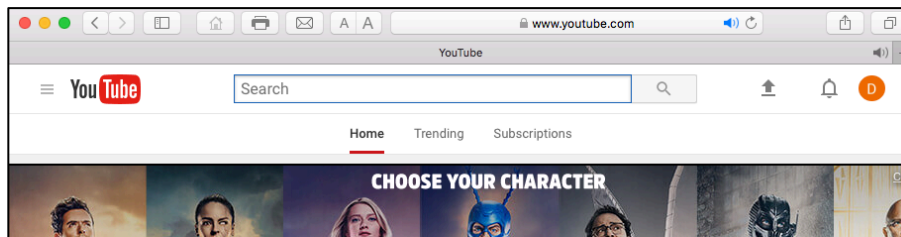

When you click the link, you will be prompted for a Username and Password.

Username = First Initial, last name (not e-mail address)  
Password = your standard DUSD password

Once logged in you will now see your username in the top right corner.

Now you are ready to access to youtube.com, just as you would any other web site.

Once logged into the web filter, you should be able to access streaming video sites for the rest of the day. You will need to login again the next day.
